565	Overlake	Federal Way	Overlake TC, Bellevue TC, Auburn Station, Federal Way TC
929	Redmond	Fall City	Redmond TC, Bear Creek P&R, (Fall City via Stillwater, Carnation)

HOW TO PUT YOUR BIKE ON A BUS

Step 1
Get the driver's attention and load from the curb side of the street. When the bus has come to a complete stop, lower the rack by pulling up on the release lever and guiding the rack down to its horizontal position.

Step 2
Place your bike in an empty rack, towards the front if it is available, fitting the tires into the slots. Each slot is labeled for either a front or rear tire.

Step 3
Pull out the support arm near the front tire so that it is long enough to fit over your tire. Then raise and lower the support arm over your front tire, making sure the support arm is resting on the tire or fender as close to the frame as possible.

Let the driver know when removing your bike. Lift off the support arm and remove the bike from the rack. If there are no other bikes on the rack, return it to its upright position.
